| <p>"Nowhere in Breed is any speed-dependent action taken."</p> | <p>The whole invention of Breed is based on speed-dependent actions (Col. 14 lines 10-21, i.e. making it safer and easier for a driver to see messages etc. while driving). The purpose of having a heads up display and changing text and graphics etc. is because of the speed-dependent of the vehicle traveling. If the vehicle does not go up to speed then there is no dependence on the video heads up display. Examiner suggest to the applicant to further expand on "from one active state to another active state" to further define what specifically these states are (i.e. adapting a video output to a different state based on speeds going from 50mph to 60mph) and include this further defined limitation into claims 25 and 26 since there is no mention of changing states at this time for claims 25 and 26. Further, the combination of Andreas</p> |
